

INTERNATIONAL COLLEGE INSIDER

End of the Year Banquet

As students finish finals and prepare to head off to summer vacation, the International College celebrates a successful completion of our second year. In order to thank all the International College faculty and staff as well as supporters of the IC, we held an end of the year banquet the evening of June 1st. It has been a successful second year thanks to the dedication, commitment, and hard work from everyone involved. We welcome new faculty who will teach for the IC next year.

With the completion of the minimester on Friday, June 17, Professor Randall Nadeau will finish his second year teaching with the International College and return to the states. For the past two years, Randall has taught GL1: Personal Identity in Historical Perspective in the fall semester and returned to teach a class on Happiness during the

spring minimester. Next semester he will teach 2 online courses while based in San Antonio, one on Social and Economic History of Taiwan and the other on Asian Religions, that will be available for the IC students to take as electives. A big thanks for your continued work with the International College.

Burritos and Ice Cream

To celebrate the conclusion of their first year at the international college, IBA first-year students gathered at Professor Sims' house for great food and company. After customizing their own burritos, students got a chance to perform a classic and tasty science experiment: homemade ice cream. It turns out all you need is milk, sugar, ice, and salt—and the flavor is up to you! Students made chocolate, vanilla, strawberry, and matcha ice cream. Thanks to the Sims family for a great afternoon!

Welcoming Prospective Students

IC students and staff excited to speak with prospective students at Open Campus.

On June 5th, Tunghai University held its 2016 Open Campus, an event designed to showcase achievements and characteristics of each department and college. First-years Josephine and Yinno along with IC staff proudly introduced the college, particularly highlighting the college's new Sustainability Science & Engineering program, which will be implemented this upcoming fall. They were fortunate enough to speak with many bright young minds about the college, and hope to see many of them at Tunghai in the coming years. We also got the chance to meet many new students and their parents.

Students Join 2+2 Programs

Next year, our first round of students go abroad to join our 2+2 programs with Trinity University and the University of Rhode Island. We are happy to announce Erica Chen, and Rita Wu will be going to Trinity University in San Antonio, Texas next fall and Scott Fu will be going to the University of Rhode Island. Erica plans to pursue a degree in Accounting, and Rita plans to study Business Administration. Scott plans to major in Global Business Management.

Scott is going to Rhode Island next year with a curious attitude and an open mind! “Through the 2+2 program, I expect to broaden my horizons and strengthen my language abilities,” he says, “I also want to meet people with distinct backgrounds and grow to become a person who can see things from different perspectives.”

A big congratulations to these three students for their handwork over the past two year and good luck on the next two!

IC Students Around the World

As the year comes to a close, we are excited to announce that we have a number of students that will be studying abroad during the summer and for the next academic year! Study abroad is an invaluable aspect of the International College as it encourages our students to improve their independence, academic knowledge, and language skills. Students have the opportunity to travel and study for a summer, a semester or an entire academic year. Tunghai University has sister school relationships with a number of universities located in Asia, Europe and the United States and we strongly encourage our students to take advantage of these opportunities!

This summer, Owen Yang, Angel Lin, Henry Wu, Karen Wu, Wendy Hong, Anddie Chang and Stanley Chou are attending the University of Rhode Island Program. This approximately 5-week program consists of English class and a technology class both taught by esteemed University of Rhode Island professors as well trips to Providence, New York, and Boston.

We also have a number of students studying in Europe for the 2016-2017 academic year. All students will take a varying amount of language courses as well as International Business courses. Irene Tsai and Iris Huang are

Sophomore study abroad students Erica Chen, Rita Wu, Michael Yang, Scott Fu, Jane Huang, Sydney Ma, Sunshine Lin, and Anddie Chang.

going to Belgium to study at Artevelde University in the beautiful city of Ghent. Jane Huang will be attending Università degli Studi di Perugia in Perugia, Spain. Sydney Ma and Tina Huang will be attending ESC Rennes School of Business in France. Michael Yang and Sunshine Lin will attend the University of Munster in Germany.

Summer Internships

This summer several students are participating in internships! Internships are an excellent chance for students to gain work experience, make business contacts with professional global leaders, and to practice English in high-pressure situations. This summer we have several students doing local internships and one student doing an internship in Hong Kong. For example, Tanya will be working with Compass Magazine writing articles and consulting on design layout as well as assisting with the American Chamber of Commerce Taichung branch. Shawna Wu will be working with Kuang Tien General Hospital in the International Health Service sector. Rising second year Shelly Huang will be working with KGI Bank located at North Point, Hong Kong focused on sorting data utilizing Excel Spreadsheets. We are so proud of our students!
